    (127, 0) Complete the task associated to this TODO comment. 7 days ago
    (21, 11) Add a nested comment explaining why this method is empty, throw an UnsupportedOpe
```

En la parte:

```
*/
public ServicioRecordatorioImpl() no usages new *
}
```

La cual va en contra de esta convención:

5.1 Implementation Comment Formats

Programs can have four styles of implementation comments: block, single-line, trailing and end-of-line.

5.1.1 Block Comments

Block comments are used to provide descriptions of files, methods, data structures and algorithms. Block comments should be used at the beginning of each file and before each method. They can also be used in other places, such as within methods. Block comments inside a function or method should be indented to the same level as the code they describe.

A block comment should be preceded by a blank line to set it apart from the rest of the code. Block comments have an asterisk "*" at the beginning of each line except the first.

```
/*
 * Here is a block comment.
 */
```

Se modificó

```
*/
public ServicioRecordatorioImpl() no usages new *

// Constructor por defecto necesario para la inyeccion de dependencias
}
```
